SUMMARY

Software Engineering student with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming, and hands-on experience in full-stack development using Java, JavaScript, Node.js, React.js, MySQL, and MongoDB to build scalable, secure RESTful APIs. Proficient in API development and testing (Postman), version control (Git/GitHub), responsive web application development, and cloud fundamentals (Azure exposure), with strong problem-solving skills and the ability to translate business requirements into reliable technical solutions.

PROJECTS & EXPERIENCE

Registration Operations Lead - CSI Student Chapter, Chitkara University

Google Forms, Excel, Dashboards

- Owned **end-to-end registration workflows** for large-scale events, designing structured dashboards and trackers to improve data visibility and decision-making.
- Cleaned, validated, and analyzed datasets to eliminate inconsistencies and support scalable operations.
- Collaborated with cross-functional teams in a **flat, fast-moving environment**, resolving issues in real time.

MediCare | React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Groq AI, Razorpay | [Link](#)

- Built a **scalable full-stack health-tech platform** with microservice-style architecture, including patient portal, admin dashboard, and centralized backend.
- Developed **secure RESTful APIs** for appointment booking, real-time doctor availability, automated scheduling, and healthcare data management.
- Integrated an **AI-powered health assistant** and implemented **payment workflows with Razorpay (test API keys)**.

codeX | react, Node.js, Express, MongoDB | [Link](#)

- Developed a **collaborative, browser-based UI** supporting real-time multi-user code editing.
- Implemented **live UI synchronization** using Socket.IO, including typing indicators and instant updates.
- Integrated AI-based code suggestions to enhance **user productivity and engagement**.
- Built secure authentication with JWT and role-based access control.
- Followed a **modular, component-based architecture**, supporting future scalability and feature ownership.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python (Basic), SQL

Frontend Technologies: Angular, React.js, HTML5, CSS3, JavaScript

Backend Technologies: Node.js, Express.js, REST APIs

Developer Tools: Git, GitHub, Postman, VS Code.

Databases: MongoDB, MySQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Problem Solving

EDUCATION

Chitkara University

Bachelor of Engineering in Computer Science

CGPA: 9.20

Himachal Pradesh, IN

Aug. 2023 – Present

ACHIEVEMENTS & CERTIFICATES

- [Microsoft Azure AI-900](#) - Foundational knowledge of AI/ML concepts and Azure AI services.
- Secured **3rd position** in **CodeWars 5.0**.
- Solved 200+ DSA problems across LeetCode, GFG, and CodeStudio.
